# *My Garden Favorites*

*May*  
*1919*

## SUMMER

It was a day that sent into the heart  
A summer feeling; even the insect swarms  
From their dark nooks and coverts issued forth,  
To sport thro' one day of existence more;  
The solitary primrose on the bank  
Seem'd as though now it had no cause to mourn  
Its bleak autumnal birth, while it partook  
The universal blessing.

Southey.

*"Just Delightfully  
Different" Seeds*

# *My Garden Favorites*

*(May Edition 1919)*

This edition will be a permanent feature for the future and will institute a most helpful chapter in garden literature. It will contain the following offers:

*Old Fashioned "Hardy Flowers" from Seeds*  
*Vegetable Seeds for Late Sowing*  
*Strawberry Plants*  
*Plants of Annual Flowers*  
*Import Offer of Bulbs for Fall Planting*

On August 1 will appear the third edition of "*My Garden Favorites*" containing an offer of the choicest Iris, Paeonies and Native Wild Flowers. Write to have your name placed on our mailing list.

In future only past and prospective  
purchasers will receive my literature,

THE HOUSE WITH "THE JUST  
DELIGHTFULLY DIFFERENT SERVICE"

right; read "Flower Lore"*

## RECORDS OF A RECTORY GARDEN

By K. S. P.

(Just Published)

The most delightful, the most charming, the most thrilling, the most gripping story of a garden, weaving the life of an only son, the jewel of a mother, from the day of birth to the hour when he gave up his life on the altar of democracy.

You will thank me for introducing this book to you—it is the most inspiring literature the world war has produced.

Here follow a few excerpts to whet your appetite:

"From the mother who bore and loved him he never really seems very far away. Sometimes she even feels that Death, in taking from her the son whose manly promise was her pride and glory, has given back to her the little child whose gay companionship was the sunshine of earlier years."

"Yet, after all, it is in the garden that the mother ever feels most conscious of the nearness and companionship of the child of long ago—the sunny old-fashioned Rectory Garden where he shouted and played from babyhood to boyhood, and which he loved unceasingly right on to the years of his manhood's strength."

"To Christopher's mother the tapping of the roses against the latticed window panes, the sighing of the wintry wind through the dark pine branches, the twilight hoot of the owls, the first call of the cuckoo, the spring beauty of the blossoming apple trees, the tender fragrance of the hidden violets, the heavy sweetness of the lilac and syringa, the slow unfolding of the earliest snowdrops, or tall white lily buds, will speak for ever more of the little lad who loved, and listened, and watched for these things. For, in the old Rectory Garden are the records of his short life written."

Price, \$1.00 Postpaid

The Most Entrancing Book on Gardening Ever Published

### "LET US MAKE A FLOWER GARDEN"

By Hanna Rion

Of all the books I have ever read—and I have read just a few—there is none in my opinion that touches so closely to our needs as the above-mentioned issue. It is a book that should be read by every amateur gardener, no matter what other books you have in your possession now.

The reading itself is so charming, so bewitching, so thrilling, so interesting, and so real that I am willing to guarantee to anyone the happiest hour of entertainment, provided you are an earnest gardener.

And in addition, it is just brimful of good, practical suggestions.

Per copy (208 pages), postpaid \$1.60

## THE OLD-FASHIONED HARDY FLOWERS FROM SEED

(Hardy Perennials)

In presenting this offer at this time I am rendering the gardening public another "Just Delightfully Different" service. It spells:

**Timely Sowing:** The seeds offered herein should be sown from May 1 till August 1. This means "efficiency" in the garden: (1) You can use the frames which are now being emptied, and (2) you will have the right kind of plants to withstand the first winter.

**How to Sow:** Sow in flats and place in a frame, with either the glass whitewashed or lath cover in place of sash. In other words, shade must be over the seedling flats. Always sprinkle with an "Ideal" watering pot, cost \$4.50.

**Where to Transplant:** Two transplantings must take place. The first, when the seedlings are large enough to be given larger space in another flat about four weeks after sowing. At least 3 in. space should be given each plant and the flat set back in the frame. The second, about Sept. 15, when they should go in their permanent quarters, and this final transplanting should not be done after Oct. 1 as these young plants must grip the soil with a set of new roots before winter sets in or otherwise they are lifted to the surface by frosts and perish.

I recommend to sow and plant in flats first for two reasons: First, because it is so much more handy to transplant and, second, because if any seedlings are not large enough by fall they can be kept so much better in the frame until spring.

### **How to Protect These Seedlings for the Winter.**

The only protection these plants require is a layer of six inches of straw after hard frost has appeared.

Please **do not** cover them with manure. It is harmful.

**Please Order by Number Only**

## THE USUAL NOVELTY OFFER

I know you enjoy this and you are really looking for it, and I want to make you happy whenever I can; but in order to do it here I would have to present almost my entire offer, for it contains so much that is new and rare that there would be little left for the rest of the story, and as I want you to read it all, I combine it. You see, there is a method in my madness.

The "January" edition of "My Garden Favorites" has had such a welcome reception and you all have sent me so many kind words about it that I don't want you to be disappointed in any of my issues. They are designed to form an indispensable set of literature for amateur gardeners and to realize that they truly fulfill their mission is a reward greater than I anticipated. I thank you.

My offer of "Perennial Seeds" is unique, as it contains nothing which is difficult to grow nor which is undesirable from the standpoint of color or character. It is so gratifying to me to note that my audience applauds my dislike for certain colors or flowers which I consider unworthy for an artistic garden. It proves that the world is progressing, notwithstanding all signs to the contrary.

Happiness for everyone is to be had for the beckoning. Just reach out for it and take your share. You are not limited. This world is beautiful to live in. It is our world, and is just what we make it.

To surround ourselves with flowers makes grouch and hate impossible; it brings sunshine where there is none; it brings us smiles and glowing cheeks and bright eyes and a look into a future, which can only be rosy. So why not follow in the footsteps of others who have found their heaven on earth?

I love to encourage the growing of any plant from seed, for it is the one redeeming feature in gardening which supplies the thrills, the heart-throbs, the suspense and finally the exultant joy. When we know that we have raised one plant from seed we feel ourselves in a higher sphere, we feel we have done something in our life worth while.

But when we play with seeds, it is not all success; in fact I dare say—you and I—have sometimes more failure than success. It is the elimination of failures to which I have devoted many years in the past, and I shall devote the rest of my life to it, for if I succeed in this, I have reached my goal—I have made gardening successful.

SEEDS OF PERENNIALS AND BIENNIALS

Achillea

Popular Name—Milfoil—Yarrow

This plant is of the easiest possible culture and this is really its fault, for it grows so rapidly that it should be lifted each spring, divided and re-set, for if this is not done it sends its root runners in all directions and you will find it coming up 50 to 100 feet away from its spot.

No. 6300. — *The Pearl*. The plants grow fully 2½ feet high and branch profusely, so that at least one foot of space must be given for each plant. These plants should be staked to look neat. Flowering season August to September. Plants form dense clusters of slender stems with narrow foliage terminating into dense perfect little double flowers of purest white .....Pkt., 25c

Alyssum

Popular Name—Gold Dust—Rockmadwort

A splendid spring flower, appearing in May, bedecked in its mantle of gold; ideal to combine with Darwin Tulips; grows only 6 in. high.

No. 6310. — *Saxatile Compactum*, golden yellow, space 1 foot.....Pkt., 10c

Anchusa

Popular Name—Alkanet—Sea Bugloss

My own suggestion for a popular name—Blue Eyes

One of the loveliest of blue flowers, which should be by the scores in every garden.

To increase this plant, lift the roots in July and cut them to pieces—See “Flower Lore.”

No. 6520. — *Italica Dropmore Var.* The gigantic, heavy, fleshy leaves, which cluster around a crown, are hairy on the reverse side and glossy deep green on the surface. From the centre of the plant appears, about the middle of June, a robust flower-spike, which grows to a height of 4 feet, and which sends out its branches in all directions, giving the flowering part a pyramid form, very similar to a spruce. Each side shoot terminates in loose clusters of giant Forget-me-not like flowers of a deep gentian blue color. The plant reaches its zenith about the end of June and remains attractive through July. If the flower-spike is cut back as soon as the flowers fade several smaller spikes will appear in August, and will last all through fall. Space, 3 feet. The plant should be staked during the flowering season.....Pkt., 25c

## **Aquilegia**

### **Popular Name—Columbine.**

If you want to enjoy perfect Columbines at all times, it is essential that you grow a fresh lot from seed each year. However, it takes two full years to have a perfect flowering plant.

While they do beautifully in the sun, they are one of the very few plants that do exceedingly well in the shade. Allow one foot of space for each plant.

My offer consists of the long-spurred varieties exclusively.

- No. 6325. — **New Scotch Long Spurred.** Originated in Scotland in a famous garden, where they are considered the peer of any. The seed I offer comes direct from this garden.....Pkt., 50c
- No. 6330. — **Fuld's Long Spurred Mixture.** This is an English strain, which I can highly recommend.....Pkt., 25c
- No. 6335. — **Coerulea Hybrids.** The well known Rocky Mountain Columbine, but appearing in all beautiful shades.....Pkt., 25c
- No. 6340. — **Chrysantha.** Pure golden yellow.....Pkt., 15c
- No. 6342. — **Coerulea.** The true Rocky Mountain Columbine, true blue and white .....Pkt., 25c
- No. 6345. — **New Giant Lavender (Novelty 1919).** Flower large, with long spurs having white or pale primrose petals and deep to silvery lavender petals and spurs—beautiful .....Pkt., 35c
- No. 6347. — **Nivea Grandiflora.** Pure white .....Pkt., 15c
- No. 6348. — **New Rose and Scarlet Shades.** Very attractive.....Pkt., 50c
- No. 6349. — **Silver Queen (Novelty 1919).** Flowers large and elegant, with long spurs, white tinged rosy sapphire.....Pkt., 35c

## **Arabis**

### **Popular Name—Rockcress**

The earliest of all perennials to bloom, glorying in its mantle of snowy white soon after snow disappears and the first warm spring days give an impetus for things to grow. Like a carpet it beds rockeries and border edges, and here it is really at home. Where spring bulbs are naturalized the association of *Arabis* gives a charming effect. *Tulip Cottage Maid* is fine coming up through this. Its height is at the most 6 inches, but when in bloom the entire plant is covered and no foliage is visible. It should be used to cover the bare spots in borders, particularly between late flowering tall plants, as it likes shade in summer in order to increase. Space to be given is 9 inches. The flowering season extends often into May.

- No. 6350. — **Alpina White**.....Pkt., 10c

### **No. 6360. — Aster Sub-Coeruleus**

Please do not mistake this for a Michaelmas Daisy, for it has no resemblance to it. From a tuft of narrow lance-like small fleshy leaves arise in June from 10 to 20 erect fleshy slender stems 12 to 15 inches high, of which each one is crowned with a most charming daisy flower of a most delightful shade of lavender blue and orange centre. For a cutflower it has no equal, and as an effect in the foreground of a border it is a joy to behold. Every second year the plants should be lifted and divided. A clump will make 25 new plants.....Pkt., 25c

### **No. 6370. — Auricula Choice Mixed**

A type of primroses which is distinguished by its rich velvety colors and its bright eyes. The plants are not at their best until the second year. Mix seeds with sand before sowing.....Pkt., 25c

## Bellis Perennis

### Popular Name—English Daisy

In England this plant is an absolute perennial, but with us in America it is only biennial.

It is one of those pleasing spring flowers coming in bloom with the tulips, with which it can be artistically combined. The pink variety is just ideal to connect with the pink flowered Darwin Tulips.

**Its Culture.** Sow seeds during May or June—not later—and, when fairly well up, transplant to another bed, allowing at least 4 inches between each plant. If you have a cold frame, sow and transplant in one and winter them in the same spot with glass as protection; but if you rely on your garden only to protect the plants during the winter with straw and transfer the plants where wanted to bloom in the spring.

No. 6380. — — Giant White .....Pkt., 25c

No. 6385. — — Giant, vivid light pink.....Pkt., 25c

Please observe that the strain I offer bears gigantic flowers, the equal of small asters.

## Canterbury Bells

### Botanical Name—Campanula media

The culture of all Biennials is exactly like that given for "Bellis" except that the time of sowing varies. For that reason I give the time of sowing only hereafter.

No. 6400. — — Single Purplish Blue.....Pkt., 10c

No. 6402. — — Single Pure White.....Pkt., 10c

No. 6404. — — Single Pink .....Pkt., 10c

## Cup and Saucer

### Botanical Name—Campanula calycanthema

The difference between this flower and the foregoing is that the Bell Flowers have an additional large spreading saucer. The culture is identical to the foregoing.

No. 6405. — — Purplish Blue .....Pkt., 25c

No. 6406. — — White .....Pkt., 25c

No. 6407. — — Pink .....Pkt., 25c

Please observe that you can make Canterbury Bells flower continuously through the season by always plucking the individual blossoms directly beneath their calyx just as each one fades.

But should you be in the habit of pulling up the plants as they are through blooming in July, then surely provide for plants of the lovely blue *Salvia Farinacea* to take their places, for they will fill the same spaces with bloom from August till frost.

## Campanula

### Popular Name—Bellflower

No. 6410. — *Carpatica* (*Carpathian Harebell*). A splendid subject for the rock garden, growing in tufts, spreading about 6 inches in diameter. In June these tiny plants are literally covered with upright bells of a clear, rich blue, which appear uninterruptedly until frost....Pkt., 15c

No. 6412. — — *Alba*. The same as the foregoing, except that the flowers are white.....Pkt., 15c

No. 6415. — *Persicifolia Grandiflora Coerulea* (*Peach Bells*). Stately border plants of unusual beauty; the slender flower-spikes grow 3 feet high, and are well dressed with bell flowers which face forward. Excellent for cutting. Flowers in June. Clear, deep blue. Space, 1 foot....Pkt., 25c

No. 6417. — — *Alba*. Pure White .....Pkt., 25c

No. 6420. — *Grandiflora Blue*, growing 4 feet high, with broad clusters of flowers on top.....Pkt., 25c

No. 6422. — — White .....Pkt., 25c

### Campanula (Continued)

- No. 6425. — *Pyramidalis* (Chimney Bell). Stout, straight spikes attain a height of 4 to 6 feet, of which several appear on a plant. The entire spike is encircled with beautiful violet-blue bell flowers in August and September .....Pkt., 25c
- No. 6430. — — *Alba*. Pure white flowers.....Pkt., 25c

### No. 6452. — *Clematquilla* (Novelty 1919)

This remarkable novelty is also called "Spurless Columbine," but must not be mistaken for the old fashioned Columbine with its thick set flowers. It originated as a cross between *Clematis* and *Aquilegia*. The flowers are large and only differ from the finest Columbines by not having any spurs. Mixed colors.....Pkt., 50c

### Coreopsis

#### Botanical Name—*Calliopsis*

A very popular and most serviceable plant for the border. The much lamented foliage grows in symmetric clusters, 12 inches high, and from its centre appear graceful, thin, wiry flower-stems growing to a height of 2½ feet, which terminate in a large Daisy-like golden flower with a yellow centre. The petals of the flower are lanced, which helps to enhance its beauty. These flower-spikes appear in great profusion from June until late autumn uninterruptedly, particularly so if the flowers are constantly cut. As a cut flower to last this is undoubtedly the best of all perennials. Space to be given, 15 inches.

- No. 6460. — *Lanceolata Grandiflora* .....Pkt., 10c

### No. 6470. — *Cerastium Tomentosum*

A splendid plant for the forefront of a border or for rockeries. It lies flat on the ground, showing neat, silvery-white leaves, and is covered in May with a carpet of pure white flowers.....Pkt., 10c

### Delphinium

#### Popular Name—Hardy Larkspur

Larkspurs are invariably the leading favorites of those who love the hardy flowers, because they have virtues of unusual merit. Stateliness in appearance, boldness in power, massiveness in form and brilliancy in effect are a few of their recommendable features. Their greatest charm to me is the loveliness of their shades, a range unapproached by any other, namely, from the palest blue to the darkest indigo and violet. The newer forms, with immensely large flowers and bee-like centres, are remarkably striking. Delphiniums are, in their season (June), the most gorgeous specie of the border, and, by intelligent arrangement and care, can be made to appear as a blaze in the garden. The stately spikes will grow from 4 to 6 feet tall, according to variety, and if cut back immediately after blooming a second crop of smaller shoots appear in August, often lasting till frost time. These plants should never be allowed to remain longer than three years undisturbed, but each year separated and replanted. This should be done in the spring. Delphiniums love a rich soil and a sunny situation. A combination of blue Larkspur with the snowy-white Ascension Lily (*Lily Candidum*) is always stunning. Both flower at the same time.

Coal ashes, strewn over the plants in the fall, will prevent slugs from destroying these plants during winter and spring. Delphiniums can be used with splendid effect, not only in the hardy border, but as well in formal or Italian gardens, or as specimen plants for a bold decoration near entrances of buildings, or in close proximity to gates. The tall-growing varieties should be given a space of nearly 2 feet; for the Chinese varieties 1 foot of space is sufficient.

Larkspur cannot only be easily grown from seed, but form one of the interesting features in connection with growing perennials from seed. Belonging, as they do, to an unusually large family of ancestors, the result of growing plants from seeds is always accompanied by chances of getting

## Delphinium (Continued)

something different from what is expected. This may be in the form of pleasant surprises or unpleasant disappointments. At any rate, we all love to live in hope. Each of the following varieties, except *Delphinium Chinensis*, does not attain its perfection until two years from sowing, although it flowers the year previous; *Delphinium Chinensis*, though, flowers even the year of sowing. Larkspur seed must absolutely be fresh in order to germinate. I pay particular attention to this fact and supply the freshest possible seed.

**Diseases.** The great trouble with these plants usually encountered is the "Blight." In the September, 1916, issue of "Flower Lore" I have disclosed an absolute remedy for this trouble.

**No. 6500. — Fuld's Surprise Mixture.** Nothing better can be offered in the way of wonderful varieties than this mixture contains. The seeds come direct from a renowned garden in England.....Pkt., 50c

**No. 6505. — Selected Belladonna (Mrs. Ormsbee's Strain).** It is with a certain amount of pride that I offer to my friends something of unusual merit. Mrs. Ormsby, whose beautiful blue garden is the envy of every gardener, has kindly consented to furnish me with seeds of her renowned "Belladonna," which is of the most heavenly blue. But Mrs. Ormsby will only furnish me seeds which are cropped this year, which will be in August, and so in consequence these seeds will be delivered in August only, when they should be immediately sown as every seed will then germinate. Mrs. Ormsby tells me that she discovered a secret in growing these plants and this is her secret. When the young plants have 2 sets of leaves she lifts and transplants them, and at that time she trims the root with a shear so that they are all of equal length, and she says that after that she can almost see them grow. This strain was never known to have had a disease, and as she has only this one kind it is absolutely true.....Pkt., 50c

**No. 6510. — Belladonna (Regular good strain).** Silvery-blue flowers. Pkt., 25c

**No. 6515. — Bellamosa.** The shape and size and habit of the foregoing except the color—a clear dark blue.....Pkt., 35c

**No. 6520. — Formosum.** Dark blue .....Pkt., 15c

**No. 6525. — Miss F. Stormonth.** A large flower of a rich indigo blue. Pkt., 25c

**No. 6530. — Chinese Butterfly.** Plants grow bushy, have fine cosmos-like foliage and bear a profusion of single cornflower-blue flowers in loose sprays. This particular variety is the finest of all.....Pkt., 25c

**No. 6532. — — Blue** .....Pkt., 10c

**No. 6533. — — White** .....Pkt., 10c

## Digitalis

## Popular Name—Foxglove

Although a biennial, it can be made perfectly hardy by cutting the flower-spikes before they have finished blooming. The result is that a number of young plants form around the old crown, and the following year a number of spikes will appear where formerly there was but one. Foxgloves require protection of leaves during the winter. Masses of Foxgloves edged with an attractively colored Sweet William make most effective groups. Well-grown plants should attain a height of 5 feet, while the foliage spreads to a circle of 2 feet. The clumps of hairy, fleshy leaves are very attractive, even when the plant is not in bloom. Seeds are best sown in the open, neither thinned out nor transplanted until the following spring. For winter protection cover with straw.

**No. 6552. — White** .....Pkt., 10c

**No. 6550. — Purplish Blue** .....Pkt., 10c

### Digitalis (Continued)

- No. 6554. — Delightful Pale Pink.....Pkt., 10c  
 No. 6555. — Pale Yellow (dwarf growing).....Pkt., 10c  
 No. 6560. — All colors blended.....Pkt., 10c

#### No. 6575. — *Eryngium Oliverianum Superbum* (Novelty 1919)

- A grand border plant, with ornamental foliage and handsome, glistening, deep-blue stems and flower heads; 3 feet.....Pkt., 25c

#### No. 6585. — *Eupatorium Ageratioides*

- A tall, bushy plant attaining a height of 5 feet, with foliage and flowers like an *Ageratum*, but color is pure white. Flowers in August. Does well in shade .....Pkt., 15c

### Gaillardia

#### Popular Name—Blanket Flower

- No. 6590. — *Lady Rolleston*. Showy plants for beds and borders, being covered with flowers from June until October, a feature quite rare with perennials. From a loose cluster of finely lacerated foliage arise numerous straight, wiry flower-stems which terminate into one large daisy-like flower of pale gold. Height of plant about 2 feet; space, 1 foot. The old flower-stem should be removed as soon as the flowers fade, to ensure a continuity of bloom and strong, healthy plant.

Pkt., 25c

- No. 6592. — Finest Mixed. All colors.....Pkt., 25c

#### No. 6600. — *Gentiana Asclepiadea*

- The Willow Gentian, a very handsome plant, producing long, leafy stems well furnished late in summer with attractive purple-blue flowers all up the stem; 2 feet.....Pkt., 25c

### Gypsophila

#### Popular Name—Baby's Breath

One of the most useful of all perennials. A fairly strong stem arising from the root, branches freely and produces a perfect bush 3 feet high and 2 feet through.

The side-shoots are extremely fine and wiry, and the foliage which accompanies the plant to half its height, is like a perfect blade of grass 2 to 3 inches long.

The entire head of the plant, to a depth of 12 inches from the flowering part, is like a sea of bloom, composed of dainty, minute blossoms of white. The effect even close-by is a perfect cloud of grayish white, misty and elegant in the extreme. When cut it forms splendid material to combine with Sweet Peas or other flowers, whose own foliage is not suitable for cutting.

In the border it relieves the concrete aspect of plants and pleases the eye. The plants are smothered with flowers during July and August. Allow at least 18 inches of space for each plant. The dead flower-heads should not be cut back until late in the fall; cutting earlier is apt to kill the plant.

- No. 6625. — *Paniculata*. Single white blossoms.....Pkt., 15c

- No. 6627. — — *Fl. Pl.* (New). The same as above, with double flowers, exceedingly handsome and fine for cutting.....Pkt., 35c  
 Please note only about 30 per cent of the seedlings are double.

#### 6650—*Heuchera Sanguinea Splendens*

#### Popular Name—Coral Bell

- A dwarf-growing plant 16 in. high, with glossy, crimped leaves, showing up the end of June an abundance of graceful, elegant sprays of deep coral pink flowers. Fine for cutting or effect.....Pkt., 25c

## Fuld's Superb Double Hollyhocks

July would indeed be a dreary month in the garden were it not for the unusual gaiety of the Hollyhocks, but in order to have beautiful shades of colors and fine healthy specimens of plants, we must re-sow them each year and please do not use your own saved seeds for they will only be poorer than what you have had.

Please observe that even though I offer seeds of double Hollyhocks, every package will produce some plants which are single, and only a certain percentage of the plants raised from seed are true to color.

To prevent rust, sterilize your bed with a 5 per cent solution of Formaldehyde and spray the plants every two weeks with the same material.

## Iberis

### Popular Name—Hardy Candytuft

Dwarf plants of upright growth and evergreen foliage, growing in tufts along a fleshy stem. Every stem, 12 inches tall, is crowned with a dense flat head of flowers early in the spring. The flowers are almost exactly like the annual Candytuft. After the flowers disappear a seed-pod of the same form as the flower, in a vivid green color, takes its place. Space, 9 inches.

| No. 6779. — Enchantress, soft blue, upper petals rose..              | Pkt. (10 seed), 25c |
| No. 6780. — Excelsior, brilliant rich mauve.....                     | Pkt. (10 seed), 25c |
| No. 6782. — Summer Cloud, soft rose, passing to deep rose.           | Pkt. (10 seed), 25c |

## Myosotis

### Popular Name—Forget-Me Not

There are two distinct strains of Forget-Me-Nots—(1) which is biennial and which must be sown each year, and (2) which is perennial and lasts for a number of years.

#### Biennial Sorts.

- No. 6790. — *Victoria*. Compact, dense plants of the brightest blue. Pkt., 15c  
No. 6792. — *Rubusta Grandiflora*. A very robust plant with large masses of flowers. Fine for cutting.....Pkt., 15c  
No. 6794. — *Sylvatica Blue King*. This is known as the Wood Forget-Me-Not and should be sown freely along woodland walks and especially in semi-damp situations.....Pkt., 25c  
No. 6795. — — *Rosy Gem*. Rose pink flowers.....Pkt., 25c

#### Perennial Sorts

These differ from the biennial kinds in that they are permanent, and for this reason alone they are to be preferred.

- No. 6800. — *Dissitiflora*. A robust growing plant with large sprays of flowers .....Pkt., 25c

## Oenothera Youngi

### Popular Name—Evening Primrose

A very valuable plant as it succeeds almost in solid shade and then flowers all summer long. Once established, it increases a hundredfold in a year. The loosely formed bushy plant grows to a height of 15 inches, and from June on is covered with bright golden buttercup-like flowers.

- No. 6825. — .....Pkt., 15c

## Fuld's Pansies

Professional growers recognize the Fanny as a biennial only, and cultivate it from this standpoint alone, sowing the seeds in frames during July and wintering the young plants in the same frames with sashes, as protection. Such plants are ready to bloom the following April, and will continue to bloom all season.

Pansies delight in semi-shaded, cool locations, and must be kept supplied with moisture during the hot months of the year.

All seed pods must be promptly removed, and when the plants become leggy they ought to be sheared.

- No. 3100. — *Fuld's Perfection Supreme*. In offering this strain I wish to demonstrate that size is not always perfection in a flower. This strain is supreme because the form is perfect and the colorings are unapproachable .....Pkt., 50c  
No. 3105. — *Fuld's Giant*. Here I am demonstrating size above everything else, and if you prefer size, this is your winner.....Pkt., 25c  
No. 3110. — *Fuld's Garden Blending*. For a general blending of a multitude of colors and substance in bloom this will give universal satisfaction .....Pkt. 15c  
No. 3120. — *Madame Perret*, plants of exceptional robustness, producing enormously large flowers of all shades of pink and red; a very attractive and satisfactory sort.....Pkt., 25c  
No. 6855. — *Pure White* .....Pkt., 20c  
No. 6860. — *Pure Yellow* .....Pkt., 20c

## Papaver Nudicaule

### Popular Name—Iceland Poppies

Splendid little blooms, which in the very early spring brighten the landscape with their delightful delicate blooms. Ideal for the rock gardens or on the edges of borders. From a tuft of light green fern-like foliage arise in profusion slender, leafless stems, 1 foot in height, each graced with a charming cup-shaped flower. Space, 9 inches.

- No. 6875. — White .....Pkt., 15c  
 No. 6876. — Bright Yellow .....Pkt., 15c  
 No. 6877. — All shades blended.....Pkt., 15c

## Papaver Orientale

### Popular Name—Oriental Poppy

The common brick red Oriental Poppy is impossible in any artistic garden, but the varieties offered here are exceedingly handsome. A fair warning—not all seeds will produce plants true to description.

- No. 6890. — Mrs. Perry. Apricot Pink.....Pkt., 35c  
 No. 6895. — Perry's White. Pure White.....Pkt., 50c

## Platycodon

### Other Botanical Name—Wahlenbergia, Campanula Grandiflora

### Popular Names—Balloonflower, Japanese Bellflower

A very hardy plant, succeeding in all kinds of soil and location. The tuberous roots produce a cluster of handsome foliage, from which arise several slender flower-shoots, which, when unsupported, have the habit of bending to the ground and rising again, so that, to be neat in appearance the plants should have a slight support. From the upper part of these slender stems appear the interestingly formed flowers in July, and from that time on they grace the plant uninterruptedly for nearly eight weeks. The buds, just previous to opening, have all the appearance of an inflated balloon, while, when open, they are of a cup-shape and start formation. Space, 1 foot.

- No. 6900. — Grandiflora Alba. White .....Pkt., 15c  
 No. 6905. — Grandiflora Coerulea. Blue .....Pkt., 15c

## Pyrethrum

### Popular Name—Colored Daisy

From a dense tuft (18 inches in diameter) of fern-like foliage arises in June a great quantity of round pencil-like flower-stems, 2 feet high, which bear a very large Daisy-like flower, in such shades as delicate pink, bright pink, flesh pink, pure white and crimson. One of the showy perennials in June and excellent for cutting. Space, 18 inches.

- No. 6950. — Single. All colors .....Pkt., 25c  
 No. 6955. — Double. All colors, seeds very rare.....Pkt. 50c

## Polemonium

### Popular Name—Jacob's Ladder

Dwarf plants well furnished with loped foliage from whose centre rise numerous fleshy flower-spikes 18 inches tall, dressed with flowers similar to sage. Flowering season, June to August.

- No. 6960. — Coeruleum (Greek Valerian). Numerous spikes of beautiful sky blue flowers with golden anthers; elegant bushy habit.....Pkt., 15c  
 No. 6965. — Album. White flowers .....Pkt., 15c

## 6975—Blue Primrose

I am sure there are few gardens that have ever enjoyed blue Primrose, and so I am glad to give you here something new. The colors vary from a violet to deep purple.....Pkt., 50c

## Blue Hardy Salvias

### The Glory of the Garden in Summer or Fall

Why tolerate the shrieking Red Salvias when we can have them in the loveliest shades of blue?

### 5010—*Salvia Farinacea*

It gives me great delight to make certain flowers more popular. Let me tell you how I came to discover this wonderful flower. Two summers ago I came to a very elaborate garden. It was in August, when there is always a scarcity of flowers compared with June, but this garden was a vast sea of heavenly blue. Irresistibly the question was on my lips: What produces this celestial effect? And, lo, behold, when I came upon it, I recognized at once my old favorite—*Salvia farinacea*. Here was an old flower employed in a new, wonderful way.

The owner of this garden grew thousands of those *Salvia* plants in pots, and whenever a bed became devoid of flowers all unnecessary growth was cut from the bed and in every inch of available space a *Salvia* plant was planted, with the result that from August on the garden, in addition to the regular features, was the mirror of the sky.

Of course, you know that blue never clashes, and so you need not be afraid to plant it next to any other color. The great additional virtue of this charming plant is its long season of bloom, for it will remain in perfect bloom from August until frost. You can plant it anywhere, for it grows from 2 to 3 ft., and only occupies about 8 to 10 in. space of width. Its color is the most lovely pale cloudy blue, the very sky on an early summer's morning.

Now doesn't this solve one of the greatest problems you were confronted with in the past? Why tolerate the Paeony bed out of bloom after June, and so with Iris; in fact all other early flowering beds?

And of course it is more than beautiful enough to make a solid bed of it.

In combination with pink Zinnias or Asters, using the *Salvia* as a background, you can create a very enticing picture.....Pkt., 25c

**PLEASE NOTE:** Splendid Potgrown Plants of *Salvia Farinacea* Deliverable in May, June and July. Dozen, \$2.00. Per 100, \$15.00.

No. 7025. — *Salvia Azurea Grandiflora*, growing to a height of 4 to 5 feet and giving us waving sprays of light blue flowers during August and September .....Pkt., 25c

No. 7030. — *Salvia Uliginosa*, similar to above, but flowering later  
Pkt., 35c

## Scabiosa

### Popular Names—Mourning Bride, Pincushion Flower

From a cluster of well-formed foliage, which remains close to the ground, appear numerous straight leafless flower-stalks, 18 inches of which is crowned with a large saucer-shaped flower, composed of an outer row of gracefully fringed petals and a centre composed of fluted filaments, of which some are unopened, creating a very artistic effect. The flowers appear in succession from June till September. Excellent for the foreground of borders. Space, 10 inches.

No. 7040. — *Caucasica*. Lavender .....Pkt., 15c

No. 7042. — *Alba*. White .....Pkt., 25c

No. 7044. — *Lutea Gigantea*, tall, pale yellow.....Pkt., 25c

## Shasta Daisy

Absolutely hardy and of easiest possible culture, but requires the following treatment in order to obtain the best results. Soon after the plant has made its growth of foliage in the springtime it begins to throw up the flowering shoots. These must be removed up to August 15th for, if allowed to develop as they first appear, the plant will flower itself to death and disappear. If treated as we suggest it will produce an enormous leaf growth and up to fifty gigantic flowers at one time, lasting from early September until the snow flies. The flower-stems will grow 15 inches high and produce monstrous white Daisies, which are not only exceedingly attractive in the garden, but form also one of the finest cutting materials.

No. 7050. — Alaska, giant flowers of pure white.....Pkt., 25c

## Stokesia

### Popular Names—Cornflower Aster, Stokes Aster

A beautiful native plant, grows from 18 to 24 inches high, bearing freely from June till October its handsome Cornflower-like blossoms, which measure from 4 to 5 inches across. It is of the easiest culture, succeeding in any open, sunny position, and not only is it desirable as a single plant in the hardy border, but it can also be used with fine effect in masses or beds of any size. Space, 1 foot.

No. 7060. — Cyanea. Bright blue.....Pkt., 15c

## Sweet William

### Botanical Name—Dianthus barbatus

These are truly "biennials" and yet you say: "Why, I have sowed them but once and have enjoyed them for years." This is quite true, but still they are not perennials. What you have enjoyed were not the same old plants, for Sweet Williams sow their own seeds freely and so you have had fresh plants grown by themselves.

But there is one thing you have not noticed; namely, the quality of each bloom has decidedly deteriorated, and so it behooves you to start with fresh seeds.

Sow the seeds from May until August in a bed in the open garden, thin them out and do not disturb them further until the spring following when you may plant them where you want them to bloom. During the winter protect them with straw. Sweet Williams have been vastly improved both in size and form of flower, and I have pleasure in introducing now two very fine examples of improved sorts:

No. 7075. — Double Giant Mixed .....Pkt., 20c

No. 7080. — — Newport Pink, salmon pink.....Pkt., 25c

No. 7085. — — Crimson King, dark crimson.....Pkt., 20c

## Thalictrum

### Popular Name—Meadow Rue

The large cluster of foliage resembles that of a maidenhair fern in enlarged form, and from its centre rise several stout, smooth flower-spikes, 4 to 5 feet high, which branch toward the top, and produce an open large head of ageratum-like flowers. When fully open these heads are a magnificent spectacle and are splendid for cutting. The flowers appear in June and July. Space, 18 inches.

No. 7000. — Aquilegiafolium, purple flowers.....Pkt., 20c

No. 7105. — Diptercarpum (new), distinct, mauve flowers; a charming novelty .....Pkt., 50c

## Valerian

### Popular Name—Garden Heliotrope

Tall steady plants attaining a height of 4 feet. The umbel shaped flowers are carried on erect but slender stems and appear in June, just as the Delphiniums are in their prime. Combined with these they are just lovely.

No. 7152 — Red .....Pkt., 15c

## Verbascum (Mullein)

When I was told that the hybridizers had changed this common weed into a lovely garden flower I was amazed and I decided to try it out. You cannot imagine how surprised I was to see them in bloom last summer. I predict a grand future for them. Nothing more stately can we find in the garden or rockery.

No. 7180. — Ellen Willmott, a grand border plant, forming great rosettes of woolly green foliage from which rise bold spikes of very large white flowers 5 to 6 feet high.....Pkt., 50c

No. 7185. — Mixed Sorts, all colors.....Pkt., 50c

## Veronica (Speedwell)

A splendid class of plants, which gives us some of our most useful material for the hardy border, and, as it is rich in shades of blue, it supplies us with a rare color. All Veronicas succeed in every possible location, are perfectly hardy and readily increase. Space, 1 foot.

No. 7205. — — Alba. Same as preceding, having white flowers...Pkt., 25c

No. 7210. — Incana. Bright silvery foliage, with spikes of amethyst blue in July and August.....Pkt., 25c

## Viola Cornuta

### Popular Name—Tufted Pansies

This is the only flower among all the perennials of which you can truthfully say—"It is always in bloom." No border today can be thought of unless some of these are embodied in it. Of course they love the outer edge; at the same time they prefer semi-shade, but I have also seen them doing splendidly right in the open sun. Shear the tops at least twice a season, say in July and September, so to keep seed pods off.

No. 7225. — — White .....Pkt., 25c

No. 7230 — — Light Violet .....Pkt., 25c

I wandered lonely as a cloud  
That floats on high o'er vales and hills,  
When all at once I saw a crowd,  
A host of golden daffodils;  
Beside the lake, beneath the trees,  
Fluttering and dancing on the breeze.  
Continuous as the stars that shine  
And twinkle on the milky way.

## VEGETABLE SEEDS FOR LATE SOWINGS

For descriptions see January edition of "My Garden Favorites."

## Novelties

Summer Asparagus .....	Pkt., 25c
Beans—The Family .....	Pkt., 25c

Celery—Paris Golden .....	\$1.50	\$12.00
White Plume .....	1.50	12.00
Standard Bearer .....	1.50	12.00

## POT-GROWN STRAWBERRIES

Plant in June and enjoy a full crop by next spring. Invariably seedsmen offer these in August, when there is but little chance for these plants to take hold. I believe I render a distinct beneficial service to my patrons by providing these for June planting, for then a full crop the following spring is assured.

**How to Plant:** Thoroughly spade the soil and enrich it. Stable manure and sheep manure are the best foods.

**Distance Between Rows and Plants:** The rows should be two feet apart and the plants in the row 1 foot.

**Care:** For the home garden it is best not to allow any runners to form, but to cut them off as they appear. In this way a planting should last at least 5 years.

**My Selection:** Here again I give a "delightfully different service" by offering only those which are best for the home garden; best because they are abundant croppers, perfect in shape and, above all, sweet, with the right aromatic flavor.

No less than 25 plants of any one sort will be supplied, and these at 100 rates.

One hundred plants are sufficient for a family of four.

## Fall-Bearing Strawberries

This class of berries is no longer an experiment, but has proven a real success. Even from a June planting you can crop in the same fall. In order to have sufficient berries at one time, not less than 100 plants should be set out.

The fall bearing, or so-styled "Everbearing," Strawberries are interesting and have merit, but as yet there has been none offered that anywhere near equals in size and beauty of berry the choice "June only" varieties. Fortunately nearly all of them are excellent in quality and give a heavy yield of fruit in June. The subsequent or autumn crop is much less profuse. If, however, the blossoms are faithfully removed from the plants until the middle to the last of June, the autumn crop will be very greatly improved, both in size of yield and the berries themselves. Aside from removing the blossoms by hand picking, the culture of these autumn-bearing varieties is the same as other Strawberries.

Upon moist, fertile land these fall-bearing Strawberries give sweet, ripe berries in a few weeks from the time they are planted. I advise "Hill Culture" for best results with these varieties.

### Advance

Taking into account all its properties, this is the best and most valuable of the Fall or Everbearing varieties as yet fully tested. In a general way, it is a good deal like the popular Superb, with larger berries. The plants, however, are better growers and more prolific. From my knowledge to date, if confined to a single variety, Advance is the one I would plant. The berries are nearly round, of good size, quite uniform in size and shape, deep crimson, firm, of meaty texture and of good quality.

Per 100, \$8.00

### Progressive

The finest of the Rockhill varieties and one that has attained wide popularity. The plants are of vigorous habit, with large, clean leaves, and they multiply better than many of the fall-bearing varieties do, and yield profusely, particularly in June. The berries are so smooth and uniform in size and shape they have the appearance of having been made in a mold, are deep crimson, glossy and of fairly good quality, but rather small.

Per 100, \$8.00

## June-Bearing Strawberries

Please make your selection to contain some of the early, mid-season and late sorts and thus you have a longer bearing season, extending often to four weeks.

### Early Varieties

**Campbell's Early**—The berries, which are exceptionally uniform in size and shape throughout the season, are bluntly conical, firm for an early variety and bright flame crimson in color. Plant a strong, robust grower and very prolific.....Per 100, \$5.50

**William Belt**—Of all the many varieties of the Strawberry grown today William Belt is undoubtedly the most popular. The plant is vigorous though not a rampant grower; succeeds upon almost all soils; invariably yields very heavily, and the berries are always of large size and high quality. Its flesh is solid and deep crimson in color, while the blossoms are large with abundance of pollen. It begins to ripen quite early and continues until almost the close of the season, the last berries being large, handsome and full-flavored. Indeed, it is a king among Strawberries, as it is firm and among the largest, many of the berries being of great size, and gives large pickings for a longer period than almost any other variety. Per 100, \$5.50

**Success**—All things considered, this is one of the best early varieties, both for the home garden and near by market. Berries slightly oblong with blunt end, bright scarlet or flame color, quite large and uniform in size, color and shape. Plants are vigorous, healthy and very prolific. Desirable for the home garden and very reliable. I have never known it to fail to give heavy pickings of attractive berries of high quality. Per 100, \$5.50

**Early Jersey Giant**—Pre-eminently the finest of the early varieties. As a matter of fact there is no known variety that ripens earlier and no variety yielding large berries that comes anywhere near it in earliness. It is also brilliant scarlet-crimson in color and exceptionally firm—by far the firmest of all early varieties.

Berries very large, conical with pointed tip, colors all over at once, has delightful aroma and rich, mild, wild strawberry flavor. Large, light green calyx or "burr," hence exceedingly showy and attractive. Blossoms large, open rather late and staminate. Plant a strong grower, with large leaves on long pliant stems, and a heavy yielder. The largest and best very early variety .....Per 100, \$7.00

### Midseason Varieties

**Barrymore**—A superb variety. The bluntly conical berries are of great size, beautiful to look upon, firm and meaty, and are of surpassing quality, rich and sugary. The color is rich dark crimson (which it holds unchanged after picked), with glossy surface. The flesh is deep red....Per 100, \$5.50

**Edmund Wilson (new)**—A striking, unique strawberry and strictly an amateur, not a commercial variety. The plants resemble potato vines in size and vigor; the berries are as large as small apples or oranges. Form globular or bluntly heart-shaped, of deep maroon color with smooth surface and quite firm. Upon a good soil the plants attain a height of twelve to fifteen inches, with a spread of fully a foot, and are enormously prolific. Per 100, \$10.00

**Hundred Dollar**—The claim of the introducer that "There is not another variety of strawberry that will outyield this giant or surpass it in quality" has been fulfilled to a large degree. The plant is a strong, vigorous grower and among the most prolific. It ripens in mid-season; the berries average very large indeed; the color is bright scarlet and the quality mild, sweet and luscious.....Per 100, \$5.50

## POT GROWN STRAWBERRIES

### Late Varieties

**Marshall**—An old variety, highly esteemed by many, especially in the New England states and New York. It is a large, beautiful berry of rich quality and meaty texture, but one which requires fertile soil and high culture. Plant of vigorous growth, with clean, healthy foliage.

Per 100, \$5.50

**Lupton**—This is the best late ripening strawberry. Berries large, bluntly conical, bright flame color, glossy and retain their color after picked; has a large double dark green calyx or "burr;" very showy and very firm. It is well nigh ideal in growth of plant and vigor.....

Per 100, \$5.50

**Commonwealth**—A most beautiful berry of a rich deep crimson color and a "delightfully different" flavor and heavy yielder.....

Per 100, \$5.50

## PLANTS OF ANNUAL FLOWERS FOR MAY AND JUNE DELIVERY

Not everyone is fortunate enough to have a hotbed or cold frame and yet they love to have gardens full of lovely blossoms; and again there are those who for the sake of children cannot go into the country until June or have their summer homes at the seashore or mountains, where plantings before June are impossible or a hardship.

To make it possible for everyone to enjoy the flowers for "everybody," I have prepared some of the most popular annuals and offer them herewith.

	Per Doz.	Per 100
<b>Ageratum</b> , dwarf blue.....	\$1.75	\$12.00
<b>Alyssum Sweet</b> .....	1.50	10.00
<b>Antirrhinum</b> (Snapdragon)		
<b>Aristocrat</b> , salmon pink .....	2.50	18.00
<b>Favorite</b> , pale pink .....	2.00	15.00
<b>Pure White</b> .....	2.00	15.00
<b>Pale Yellow</b> .....	2.00	15.00
<b>Deep Yellow</b> .....	2.00	15.00
<b>Asters</b> , Fuld's Plume, pure white.....	1.50	10.00
<b>Shrimp Pink</b> .....	1.50	10.00
<b>Clear Lavender</b> .....	1.50	10.00
<b>Aster</b> , Late Branching, pure white.....	1.50	10.00
<b>Bright Pink</b> .....	1.50	10.00
<b>Lavender</b> .....	1.50	10.00
<b>Calendula</b> (Pot Marigold) .....	1.50	10.00
<b>Candytuff</b> , White .....	1.50	10.00
<b>Pink</b> .....	1.50	10.00
<b>Lavender</b> .....	1.50	10.00
<b>Chrysanthemum</b> , Queen of Tokio.....	2.00	15.00
<b>Heliotrope</b> , Dark Sweet .....	2.50	18.00
<b>Annual Larkspur</b> , Newport Pink .....	2.00	15.00
<b>Lobelia Dwarf</b> , Blue.....	2.00	15.00
<b>Giant Annual Yellow Mallow</b> (New).....	\$2.50	18.00
<b>Marigold</b> , French .....	1.50	10.00
<b>African</b> .....	1.50	10.00
<b>Mignonette</b> , Sweet .....	1.50	10.00
<b>Phlox Drummondii</b> , Pale Yellow .....	1.50	10.00
<b>Salmon Pink</b> .....	1.50	10.00

## SPECIAL IMPORT OFFER OF FALL BULBS

For Planting in the Fall and Blooming in the Spring

The advantage of this offer consists in the fact that all orders received early in Holland will be reserved from the best stock and packed in Holland for each particular customer. It saves time, packing material and the risk of surplus at this end and this saving is credited to you, by offering these bulbs at much lower prices than I will have to charge for these in the fall, when the bulbs are in stock. To take advantage of this offer, **you must** place your order with me at once and not later than

**JULY 15TH**

**Important Notice:** The Federal Horticultural Board has ruled that after June 1st, 1919, no bulbs except those as offered here can be imported into the United States, which means that no longer can we enjoy Snowdrops, Scillas, Spanish or English Iris, Push Kinnias and many of the other beautiful spring blossoms. We should, therefore, use greater quantities of Hyacinths, Tulips and Daffodils, etc.

**Deliveries of these orders are made in September and October**  
**IN "FLOWER LORE," By Maurice Fuld**

A monthly magazine for the garden amateur has been published, the most thorough and complete treatise on how to grow bulbs in the house or garden. Subscription, \$1.25 per year.

Write for sample copies and rates for back issues.

### DUTCH HYACINTHS

**Selected First Size Bulbs for Pot Culture and for Exhibitions**

The quality of Hyacinths varies as to the size and plumpness of the bulbs. I know my patrons want the best only, and so I offer here only the choicest product of Holland. Nothing better can be produced in the world.

In ordering please state—Selected first size.

Lord Balfour, lilac, tinged violet, very large bells.....	25c	2.50	20.00
Sir William Mansfield, purplish mauve.....	25c	2.50	20.00

## SELECTED GARDEN HYACINTHS

This grade is considered the best value offered in Hyacinths; the bulbs being of the same age as first size, but falling just below the required measurements of the latter; hence the important reduction in price.

For outdoor planting in beds and borders, they are preferable to their larger brothers; the flower spikes not being quite so heavy, endure much better the occasional rough winds during spring time. Of course, they will do for pot purpose as well when the best spike is of secondary importance.

Although this size of bulbs can be supplied of all the varieties listed in this catalogue, I recommend the following for size of flower, good resistance against weather and for forcing quality.

All of the varieties offered below are:

**\$2.00 Per Dozen; \$15.00 Per 100**

Not less than six bulbs of any one kind should be ordered.

Please mention "Selected Garden Size" when ordering.

Cardinal Wiseman, bright rose, dense spike, late.  
De Wet, fine light rose, a sport of Grand Maitre.  
Gertrude, rosy pink, compact russ, equally good for bedding and forcing.  
Gigantea, blush pink.  
Lady Derby, bright rose, fine, forces early.  
La Victoire, extra scarlet red.  
Moreno, deep pink, very fine large bells, forces early.  
Queen of the Pinks, beautiful rosy pink, extra large truss.  
Pink Perfection, delicate pink, shaded lavender, very fine.  
Robert Steiger, deep carmine.  
Roe des Belges, deep scarlet extra.  
Rose a Merveille, rosy pink, fine for growing in pans.  
Rosy Gem, deep rose, large bells, very good bedder.  
Angenis Christine, pure white.  
Arentine Arendsen, very fine pure white.  
Baroness van Tuyll, pure white, good spike.  
General Vetter, blush white.  
Grande Blanche, blush white, good spike.  
Grandeur a Merveille, rosy white.  
La Franchise, waxy white.  
La Grandesse, large bells, very fine pure white, excellent for forcing.  
L'Innocence, pure white extra, forces well.  
Mme. van der Hoop, pure white, large bells, fine for pots.  
Mr. Plimsoll, ivory white.  
Captain Boyton, light blue shaded darker blue, early forcer.  
Grand Lilac, light blue, shaded lilac.  
Grand Maitre, deep porcelain blue, beautiful spike equally good for bedding and forcing.  
Grand Monarque, fine light blue.  
Johan, pale porcelain, extra fine bedder.  
King of the Blues, fine deep purplish blue, the best deep blue for all purposes.  
Marie, deep blue.  
Queen of the Blues, pale blue, large spike, very fine for potgrowing.  
Potgieter, pale blue.  
Pieneman, dark porcelain, large bells.  
Pearl Brilliant, very pale blue.  
Regulus, light blue.  
Schotel, pale blue, forces well.  
City of Haarlem, extra deep yellow.  
King of the Yellows, bright yellow, compact spike, late.  
Yellow Hammer, pure yellow, very fine, excellent for forcing.  
Lord Balfour, purplish violet, large bells.  
Sir Wm. Mansfield, purplish mauve, forces well.

## THIRD SIZE HYACINTHS

Recommended for massing in pans and in the garden, the bulbs are of the same size as the extra quality mixtures, but we supply named varieties, which may be well used for forcing and when planted in borders are all of one single shade of pink, red, etc.

All of the varieties offered below are:

**\$1.50 Per Dozen; \$10.00 Per 100**

**Not less than six bulbs of any one kind should be ordered.**

Please mention "Third size Hyacinths" when ordering.

Single red and rose	named	Double red and rose	named
Single blush and pure white	"	Double white and blush white	"
Single dark and light blue	"	Double dark and light blue	"
Single yellow	"	Double yellow	"

## MIXED HYACINTHS

For large plantings, where the price of second size bulbs makes their use prohibitive, this size is used with much success. As these bulbs may be planted more closely together the solid color effects of the beds will also be greater, the ground being better covered with blooms.

Please mention "Mixed Hyacinths" when ordering from this offer.

Please note that the shades mentioned are mixed and not separate.

All of the varieties offered below are:

**\$1.50 Per Dozen; \$10.00 Per 100**

**Not less than six bulbs of any one kind should be ordered.**

Single red, all shades	Double red, all shades
Single rose and pink	Double rose and pink
Single dark red	Double dark red
Single white, all shades	Double white, all shades
Single pure white	Double pure white
Single blush white	Double blush white
Single blue, all shades	Double blue, all shades
Single light blue	Double light blue
Single dark blue	Double dark blue
Single yellow	Double yellow
Single, all colors	Double, all colors

William the Third, bright red, very large flowers, excellent bedder .....	.85	6.00
Yellow Rose, true, deep yellow, late .....	.85	6.00

# BREEDER TULIPS

Old Dutch self-colored Tulips which have been neglected for many years. The present taste of artistic colors has, however, called them into prominence once more. Nature's happiest color combinations of purple and bronze, grey and lilac, yellow and bronze, brown and orange, are revealed to us in this group. The flowers are mostly large, but of perfect form and are borne on tall strong stems.

They may be successfully brought into bloom in the greenhouse by the first week in April.

Adeline Patti, large flower, deep wine red, shaded lilac, fine white base, edged steel blue .....	2.50	18.00
Alcide, yellow tinted bronze .....	1.25	9.00
Apricot, deep bronze orange .....	2.75	20.00
Archeron, brown red .....	1.00	7.50
Aspasia, wine red, shaded purple, large blue base, large flower .....	1.25	8.00
Attraction, bluish violet outside, glowing purple inside on a white base .....	1.25	9.00
Bacchus, deep plum purple with darker bloom on outer petals, large, very fine flower .....	Each, 1.25	
Bronze King, golden bronze .....	2.50	18.00
Bronze Queen, buff, tinged apricot .....	1.60	12.00
Cardinal Manning (Syn. King's Court), a curious blend of mauve and rose which changes to an almost pure orange at the extreme edges of the petals .....	1.00	7.50
Charles Dickens, soft carmine rose and white base, large egg-shaped flower .....	4.00	30.00
Chestnut (La Nuit), dark brown .....	1.25	9.00
Clio, buff, tinged apricot and bronze .....	1.50	11.00
Colonel Astor, light purple, white base with blue halo, large flower .....	1.60	12.00
Copernicus, dark coppery bronze, shaded old rose		
Each, 1.00		

BREEDER TULIPS (Continued)		Doz.	100
Don Pedro, very distinct, a dull brown shaded maroon, inside mahogany, scarce.....	Each, .60		
Elizabeth Pegg, beautiful heliotrope .....	1.60	12.00

Splendid mixture of all colors.....	.85	6.00

**FULD'S SUPERB DARWIN TULIPS**

Not too much can be said in praise of this class of tulips and every garden should have them. They excel in brilliancy of colors, perfect form of flowers and very tall strong stems. For splendid effect in borders and planted in small groups amongst shrubs they are unsurpassed. As a cut flower, they are of great value and may be had in bloom from the middle of March. The following varieties are very fine and not too expensive: Baronne de la Tonnaye, Clara Butt, Donders, Dream, Europe, Flambeau, Glow, G. de Cordous, Gustave Dore, Harry Beitch, Leonardo da Vinci, Loveliness, Margaret, May Queen, Mrs. Krelage, Ouida, Ph. de Commynes, Pride of Haarlem, Rev. Ewbank, Salmon King, Suzon, The Sultan, Van Poortvliet, White Queen, Wm. Copeland. Wm. Pitt.

**Varieties for Exhibition**

Centenaire, City of Haarlem, Duchess of Hohenberg, Duke of Portland, Edmee, Erguste, Flamingo, Frans Hals, Galatea Giant, Gryphus, Isis, Jubilee, L'Inenue, La tulipe noire, Lioba Moralis, Pensee Amere, Prince of the Netherlands, Princess Juliana, Psyche, Queen Mary, Remembrance, Rev. Harper Crewe, Salmonea, Sir Trevor Lawrence, Suzon, the International, Valentine, Viking, Wally Moes, Whistler, Zulu.

In order to obtain perfect flowers for this purpose, we advise our customers to protect the Darwin beds with a stout wooden frame before their blooming and to cover the plants with cheese cloth to protect the flowers from direct rays of the midday sun or from night frosts or rough winds.

Although several of the leading varieties such as Clara Butt, Mr. Farncombe Sanders, etc., are excellent for exhibition, we recommend the above as the choicest and most distinct of the newer kinds.

**Special Offer**

To introduce this wonderful class of Tulips to every garden I will offer a special collection of 25 choice sorts—my selection—10 bulbs of each sort or 250 bulbs in total at.....\$20.00

Prince of the Netherlands, deep cerise rose, margined pink, pale blue center, large flower.....	2.00	15.00
Princess Elisabeth, soft lilac rose edges of a paler shade on clear white base, very pretty.....	1.75	12.00
Princess Juliana, flowing rosy vermilion, light blue base.....	.85	6.00
Professor Rauwenhof, bright cherry red, shaded salmon, inside paler center .....	1.75	12.00
Psyche, soft rose, inside silvery rose, base tinted blue, large flower on a very long stem.....	.85	6.00
Purple Perfection, maroon purple, large flower.....	1.50	12.00
Pygmalion, purplish carmine.....	1.00	7.50
Queen of Roses, rose, shaded blush.....	.85	6.00
Queen Wilhelmina, white tinted rosy lilac.....	.85	6.00
Raphael, deep purplish claret.....	1.50	12.00
Remembrance, silvery slaty violet, dull smoky base.....	1.00	7.00
Rev. Ewbank, heliotrope lilac, with paler edge.....	.85	6.00
Rev. Harper Crewe, deep amaranth red, margined rosy, white base, margined blue .....	1.50	12.00
Rev. H. H. d'Ombraïn, bright vermilion red, large blue black base, margined white .....	1.50	12.00
Rev. Wally Dodd, deep violet mauve, very large flower, very deep blue center with white.....	4.00	30.00
Ronald Gunn, violet with lavender edge and white center.....	2.50	18.00
Roi d'Islande, deep violet rose, fine.....	2.50	18.00
Salmonea, beautiful salmon rose, extra novelty.....	6.50	50.00
Salmon King, fiery salmon, extra, one of the brightest shades of all .....	.85	6.00
Scarlet Beauty, fiery scarlet.....	.85	6.00
Sieraad van Flora (Flora's Ornament), large flower, fine rose..	1.00	7.50
Sir Joseph Hooker, brilliant deep scarlet with blue and white center .....	1.25	9.00
Sir Trevor Lawrence, reddish violet, tinted copper, light base, large flower .....	1.25	9.00

### DARWIN TULIPS (Continued)

	Doz.	100
Sophrosyne, rosy blush tinted lilac, darker inside, blue base, light edge .....	2.00	15.00
Spring Beauty, bright scarlet, blue base, fine.....	.85	6.00
Suzon, large buff rose, deeper shade inside, blue base extra....	1.00	7.00
Tak van Poortvliet, glowing deep rosy red, blue center.....	.85	6.00
The International, dark purple, large flower.....	1.75	12.00
The Sultan, glossy maroon black.....	.85	6.00
Valentine, violet, blue center.....	2.00	15.00
Viking, deep intense violet, margined lavender violet.....	1.25	9.00
Viola, beautiful purple violet, large flower.....	1.25	9.00
Wally Moes, soft silvery heliotrope, large flower.....	2.00	15.00
Washington, carmine rose with white base.....	1.00	7.50
W. Copeland (Sweet Lavender).....	1.75	12.00

This is the best early forcing Darwin tulip and may be had to perfection early in January. Its color, when forced, is a delicate lavender, very rare at that time of the year. For outdoor growing I cannot recommend it, as the color is a common rosy lilac in the open.

Whistler, crimson scarlet, blue base, edge white, extra fine...	.85	6.00
Wm. Goldring, brilliant dark carmine rose with crimson shading, center electric blue and white.....	2.50	18.00
William Pitt, deep scarlet, tinted purple blue and white center; excellent for pots.....	1.75	12.00
White Queen (La Candeur), white, passing off pink.....	.85	6.00
Zulu, dark purplish black, extra.....	1.75	12.00

There is scarcely another spring-flowering bulb to rival Darwins in garden planting, for it is there that the stately, noble and dignified character of the plants gain fullest expression.

### MAYFLOWERING TULIPS

Superfine mixed .....	.60	4.00
Avis Kennicott, rich yellow black base, large flower.....	1.25	9.00

Preciosa, red, gold striped.....	.85	6.00
Supersine, mixed .....	.60	4.00

First came the forward darlings of the Spring;  
Snow drops, and violets, and daisies white,  
The year's faint smiles before its burst of mirth,  
The soft sweet-breathing babies of the earth.

Frances A. Kemble.

## CROCUS

Our grower says:

"As the list of Named Crocus which is generally offered to the trade only contains a few really good sorts like *Purpurea Grandiflora* and *King of the Whites* and almost all the others are very inferior flowers, we have tried, by crossing some of the best, to obtain a better strain. The results of our endeavors exceeded all expectations, and especially in white and striped varieties we have something far better to offer to the trade than the older sorts. The flowers of our new strain are large cup-shaped, of good substance, and almost all of them have very conspicuous protruding orange anthers.

"In order to grow Crocus successfully in a room or in greenhouses the pots or flats in which they have been planted should be kept in the bulbpit outdoors or in a cold cellar until the middle of January, because even a moderately mild temperature before that date will spoil them. A few degrees of frost will do no harm. After January 15th a steady temperature of 50 or 60 degrees will bring them into bloom in a few weeks.

## NEW VARIETIES

Per 100

Archillas, purple.....	\$ 4.00
Apollo, very deep purple, extra fine.....	4.00
Aspasia, white with pale lilac stripes.....	3.00
Caesar, purple, fine large flower.....	5.00
Edina, fine large flower, mauve stripes on white ground and white margin, base and stem purple.....	3.00
Julia Culp, large purple with narrow white edge.....	5.00
Kathleen Parlow, purest white, large orange anthers, fine substance, extra .....	4.00

John Bright, deep purple, early.....	3.00
King of the Blues, extra large purple.....	5.00
Lord Palmerston, bright purple .....	3.00
Marquis of Lorne, very fine purple, large flower.....	4.00
Maximilian (Dorothea), a pleasing shade of lavender, distinct from all others .....	3.00

## CROCUS

### Blue and Purple Varieties (Continued)

Per 100

Non Plus Ultra, purple with conspicuous white edge.....	3.00
President Lincoln, deepest purple.....	3.00
Prince Albert, deep blue .....	3.00
Purpurea Grandiflora, dark purple, extra large flower.....	5.00
Victor Hugo, very dark .....	3.00

### White Varieties

Caroline Chisholm .....	3.00
Montblanc, pure white .....	3.00
Queen (King) of the Whites, large pure white, very floriferous, extra white Crocus .....	3.00
Queen Victoria .....	3.00

### Striped Varieties

Albion, large flower, purple with white feathers.....	3.00
La Majestueuse, white striped lilac.....	3.00
Lothairk, extra fine deep purple stripes on white ground.....	3.00
Madame Mina, light lilac striped.....	3.00
Sir Walter Scott, white striped pale lilac.....	3.00
Golden Yellow, extra large.....	3.00
Cloth of Gold (Susianus), yellow.....	2.00
Cloth of Silver, pale yellow.....	3.00

## NARCISSUS

### Large Trumpet Daffodils

	Doz.	100.
Cornelia, deep yellow trumpet, broad yellow perianth (Award of Merit R. H. S., 1905) (Improved Emperor).....	2.00	16.00
Emperor, deep primrose perianth, rich full yellow trumpet, extra fine, double nosed bulbs.....	1.50	10.00
First size bulbs .....	1.00	7.50
Empress (Bicolor), perianth white and of great substance, bright yellow trumpet, fine double nosed bulbs.....	1.50	10.00
First size bulbs .....	1.00	7.50
Glory of Leyden, immense trumpet and perianth, deep yellow	2.00	14.00
Golden Spur, true golden yellow, very early, excellent for forc- ing, largest, first size double nosed.....	1.50	10.00
First size, round .....	1.00	7.50
Grandis (Bicolor), white perianth, long yellow trumpet, late flowering, dwarf .....	1.00	7.50
Henry Irving, broad yellow perianth, fine yellow trumpet, extra early, good forcer.....	1.50	10.00
Horsfieldii (Bicolor), white perianth, yellow trumpet, early, extra mother bulbs .....	1.50	10.00
Round bulbs .....	1.00	7.50
J. B. M. Camm (Bicolor), perianth white trumpet, creamy yel- low, handsome flower.....	1.50	10.00
King Alfred, golden yellow perianth and trumpet, the latter of beautiful form with deeply frilled mouth, large bold flower, strong grower, double nosed.....	Each .50	
Round bulbs .....	Each .40	
Madame de Graaf, pure white perianth, soft primrose trum- pet, passing off almost white, very beautiful.....	1.25	9.00
Madame Plomp (Bicolor), twisted perianth, golden yellow trumpet .....	1.50	9.50
Major, yellow, old variety.....	1.00	7.50
Maximus, deep yellow, bold trumpet, perianth, elegantly twisted .....	1.25	9.00

## LARGE TRUMPET DAFFODILS (Continued)

	Doz.	100.
Mrs. Harry J. Veitch, golden yellow trumpet, broad pale yellow perianth, very handsome, free-flowering variety.....Each	.35	
Mrs. Thompson, pure white, early strong grower.....	1.25	9.00
Obvallaris (Tenby Daffodil), distinct pure yellow.....	1.00	7.50
Olympia, a splendid variety.....	3.50	25.00
The trumpet is yellow with a perianth of slightly paler shade. The flower is much larger in size than Emperor and, besides, being very effective for potwork. We are convinced that it will have a future as a cut flower, as its forcing qualities are beyond doubt.		
This is a remarkably fine Daffodil—one of the very best. It is a large trumpet variety not of that smooth and even appearance which delights the heart of the exhibitor, but of a bolder and more negligee look. In color it is of much the same shade of yellow as Emperor. If anything, rather deeper. It is a good increaser, of a most robust constitution, and equally useful as a border or pot plant. I would not advise it for forcing like Golden Spur, but for bringing into flower from mid-February onwards it is a fine subject.		
P. R. Barr, pale yellow perianth, rich yellow trumpet.....	1.25	9.00
Princeps, yellow, sulphur white perianth, extra stock, best double nosed bulbs .....	1.25	9.00
First size, round bulbs.....	1.00	7.50
Princess Ida, white perianth and trumpet, edged yellow.....	1.25	9.00
Spring Glory, clear white perianth, with long petals and long chrome yellow trumpet, reflexed brim.....	3.50	25.00
Silver Spur, very early bicolor, opening a few days later than Golden Spur .....	1.50	10.00
Van Waveren's Giant.....Each	.25	
This is the largest of all Narcissi. The flowers are of huge dimensions, perianth primrose, with bright yellow trumpet. It is a splendid forcer and we strongly recommend customers to give it a serious trial, as it is sure to catch the public's attention on account of its gigantic appearance. Being a vigorous grower, I consider it one of the best propagators of all Narcissi.		
Vanilla, large yellow trumpet with sulphur yellow perianth, vanilla scented .....	1.50	10.00
Victoria (Bicolor), yellow trumpet, creamy white perianth, excellent for forcing, first size, double nosed.....	1.50	10.00
First size, round.....	1.00	7.50
Weardale Perfection (Bicolor), perianth white, trumpet sulphur. This is one of the finest daffodils for growing under glass. The flowers last a long time and possess a delicate charm seldom met with in other varieties, Each	.50	
William Goldring, pure white, perianth, primrose trumpet.....	1.25	9.00
Von Sion (Spurius), pure yellow, large expanded trumpet, excellent for forcing single.....	1.00	7.50
W. P. Milner, sulphur trumpet .....	1.75	12.00

## MEDIUM TRUMPET NARCISSUS

Barri Albatros, perianth white, pale lemon cup, frilled and edged glowing orange red, beautiful.....	1.00	7.50
— Bull Finch, lemon perianth, cup heavily edged orange....	1.50	10.00
— Conspicuous, broad yellow perianth, broad short cup edged bright orange scarlet, very free bloomer.....	1.00	7.50

## MEDIUM TRUMPET NARCISSUS (Continued)

	Doz.	100
— Firebrand, creamy white, fiery red cup, very distinct.....	1.50	10.00
— Glitter, may be called the yellow poeticus Ornatus, deep yellow with beautiful scarlet rimmed eye; very pretty when grown in pans.....	1.25	9.00
— Lady Godiva (Barbara Holmes), very elegant form, perianth white, cup broad, yellow edged, bright orange scarlet....	1.00	7.50
— Seagull, large spreading pure white perianth, cup canary, edged apricot, extra, very charming flower.....	1.00	7.50
— Sensation, white perianth, yellow cup, edged orange scarlet .....	Each .30	
— Southern Star, very fine, well shaped pointed perianth, expanded crown of bright yellow, banded with orange, Each. .50		
Incomparabilis, Simplex, yellow, deep yellow cup, large and free flowering .....	.85	6.00
— Autocrat, deep yellow perianth and cup, very pretty.....	.85	6.00
— Beauty, perianth sulphur-barred yellow, large cup margined, orange scarlet .....	1.25	9.00
— Carolina, yellow, cup tinted orange, a little crinkled, This variety is splendid for late forcing.....	1.00	7.50
— Frank Miles, soft clear yellow, twisted perianth, handsome flower .....	.85	6.00
— Gloria Mundi, clear yellow perianth, much expanded orange scarlet cup .....	1.50	10.00
— Homespun, perianth, soft pale yellow, fine expanded cup of same color, extra.....	Each .60	
— Lady Margaret Boscawen, a magnificent bicolor, pure white perianth, broad segments, large, bold expanded, deep yellow cup .....	Each 1.00	
— Leonie, a beautiful deep yellow Incomp. much recommended for late forcing; produces an abundance of flowers	1.00	7.50
— Lucifer, handsome white perianth, cup of glowing orange red .....	1.25	9.00
— Mabel Cowan, white orange cup.....	.85	6.00
— Sir Watkin, sulphur petals, deep yellow cup, very handsome, large flower, double nosed bulbs.....	1.50	10.00
First size, round bulbs.....	1.00	8.00
— Stella, white perianth, yellow cup.....	.85	6.00
— Stella Superba, a fine bold flower, much larger than the preceding, clear white perianth, yellow cup.....	1.00	7.00
— Torch, yellow perianth, deep orange crown.....	1.25	9.00
— Will Scarlet, creamy white perianth, large rimmed fiery orange red cup, distinct.....	Each .40	
Leedsii, type silvery white, lemon cup.....	.85	6.00
— Bridesmaid, pure white perianth, broad white cup, slightly margined pale primrose and crinkled at brim.....	1.00	7.00
— Duchess of Westminster, large pure white perianth, long soft canary cup, tinged orange, passing off almost white, very fine .....	1.50	10.00
— Evangeline, large pure white perianth, soft lemon cup, strong grower .....	3.00	20.00
— Minnie Hume (Queen of England), white perianth, lemon cup .....	.85	6.00
— Mrs. Langtry, perianth white, white cup with primrose edge which passes off white, very flowering and showy....	.85	6.00
— Waterwitch, perianth and cup snowwhite, large flower.....	2.00	15.00
— White Lady, broad round overlapping perianth, pale canary cup, very fine, eucharis shaped.....	1.50	10.00

## SMALL FLOWERED JONQUILS

	Doz.	100
<b>Odorus Campernelli</b> , very free flowering, bright yellow.....	.75	5.00
— <b>Plenus</b> , double yellow, the true and rare form of the double Campernelli; the flowers are seated on stems 2 feet high, quite double and number from 1 to 3 on a stem; very handsome .....	.75	5.00
<b>Odorus Rugilosus</b> , rich yellow, broad perianth and cup.....	.75	5.00
<b>Jonquilla</b> (Single sweet-scented), rich yellow .....	.60	4.00
— <b>Flore-pleno</b> (the double Jonquil), double rich yellow, very fragrant .....	.75	5.00
<b>Tenuior</b> (Silver Jonquil), sulphur yellow cup.....	1.00	7.00

## SMALL CUPPED DAFFODILS

<b>Burbidgei</b> , perianth white, scarlet crown .....	.75	5.00
— <b>Blood Orange</b> , broad lemon petals with very bright orange scarlet eye .....	.75	5.00
— <b>Eyebright</b> , very distinct, pure white overlapping perianth, brilliant flat orange scarlet eye.....	1.50	10.00
— <b>John Bain</b> , white, lemon cup.....	.75	5.00
— <b>Stonechat</b> , yellow, crown edged deep orange.....	.75	5.00
— <b>Vivid</b> , ivory white, glowing orange red cup.....	2.50	18.00
<b>Engleheartii Circlet</b> , broad imbricated cream perianth, yellow crown brightly rimmed orange.....	3.00	20.00

## POET NARCISSUS

<b>Poeticus, Recurvus</b> (the old Pheasant's eye), pure white perianth, cup deep orange red.....	.75	5.00
— <b>Glorry of Lisse</b> , the improved Poeticus ornatus, a splendid forcer .....	.85	6.00
— <b>King Edward</b> (Almira), broad pure white perianth, orange scarlet crown .....	1.00	7.00
— <b>Laureate</b> , one of the largest and best, flower of good substance, pure white eye edged dark red.....	1.75	12.00
— <b>Ornatus</b> , pure white perianth, broad cup margined scarlet, early, double nosed bulbs .....	.85	6.00
First size, round bulbs.....	.75	5.00
— <b>Poetatum</b> , white perianth, bright orange scarlet cup.....	.85	6.00

## NARCISSUS POETAZ HYBRIDS

(Narcissus Poeticus Ornatus—Narcissus Polyanthus Varieties)

The individual flowers of this class have more or less the Poeticus size, without the disagreeable scent of Polyanthus Narcissi.

<b>Alsace</b> , petals pure white, yellow eye, large flowered, mostly three flowers on a stem.....	1.10	8.00
<b>Aspasia</b> , perianth pure white, yellow eye, large flowers (4 to 5) .....	.85	6.00
<b>Elvira</b> , pure white, yellow eye, large flower, 3 to 4 flowers on a stem, very free flowering.....	.85	6.00
<b>Irene</b> , perianth pale yellow, orange eye, 8 to 9 flowers on a stem .....	1.10	8.00
<b>Jaune a Merveille</b> , four to six flowers on a stem, soft primrose perianth, bright yellow cup edged orange.....	2.00	15.00
<b>Klondyke</b> , perianth yellow, deep golden yellow eye, 6 to 7 flowers on a stem.....	2.00	15.00
<b>Triumph</b> , pure white perianth, deep yellow eye.....	1.75	12.00

## NEW POETAZ NARCISSUS

The following are the latest acquisitions in this section:

**Characteristics:** They are nearer the type of Polyanthus Narcissi, the colouring is more distinct and the individual flowers are longer. They form an altogether superior race and are splendid pot plants.

	Doz.	100.
<b>Admiration</b> , pale yellow, cup scarlet edged.....	2.35	18.00
<b>Antigone</b> , white perianth, bright yellow cup (4 to 5 flowers)...	1.50	10.00
<b>Bouquet Enorme</b> , white perianth, yellow cup, large truss....	1.75	12.00
<b>Eurydice</b> , pure white, lemon cup, grand truss (4 to 5 flowers)...	.85	6.00
<b>Grace Fornes</b> , pure white perianth, orange yellow cup, large flower .....	.85	6.00
<b>Hamon</b> , yellow, deep yellow cup, extra fine in pots.....	2.35	18.00
<b>Joconde</b> , pale yellow perianth, deep golden cup (4 to 5 flowers)	1.75	13.00
<b>Laurens Koster</b> , pure white perianth, large yellow cup, long stems .....	1.50	10.00
<b>Lucrece</b> , pure white perianth, large flower, orange yellow cup with orange margin, extra.....	1.10	8.00
<b>Mignon</b> , white perianth, cup creamy white with deep orange scarlet edge, very distinct (3 to 4 flowers).....	1.25	9.00
<b>Profusion</b> , white perianth, small yellow cup.....	.85	6.00
<b>Sovereign</b> , yellow, deep yellow cup, very fine (5 to 6 flowers)...	2.00	15.00

### MIXTURES OF DAFFODILS

Extra mixture of trumpets .....	1.00	7.50
Extra mixture of Incomparabilis, Barri, Burbidgei and Leedsii varieties .....	.85	6.00
Fine mixture of all kinds for naturalization.....	.85	6.00

### DOUBLE DAFFODILS

<b>Alba</b> , plena odorata, double pure white.....	1.00	7.50
<b>Campernel</b> (Odorus), plenus, double yellow, true form of the double Campernel .....	.85	6.00
<b>Incomparabilis</b> , double (Butter and Eggs), double light yellow.	1.25	9.00
— <b>Golden Phoenix</b> , light yellow with deep golden center....	1.50	10.00
— <b>Orange Phoenix</b> (Egg and Bacon), large double white with orange base .....	1.25	9.00
— <b>Sulphur Phoenix</b> , large double white with sulphur center..	1.25	9.00
<b>Von Sion</b> , first size, double nosed .....	1.75	13.00
First size, extra round .....	1.25	9.00

## POLYANTHUS NARCISSUS

<b>Soleil d'Or</b> , yellow orange cup, excellent for early forcing, extra large bulbs .....	1.25	9.00
<b>Paperwhite</b> (Mammoth bulbs) .....	1.00	7.50

### SUMMER SONG

My heart's a yellow butterfly That flutters down the road; A beggar, tricky, dancing thing That scorns a fixed abode.	The aigrette of the thistle bloom Becomes the swinging sign Of merry hostelrys, where I May pause awhile and dine.
--	---

The sky is lapis lapis lazuli  
 Bestrewn by clouds of pearl—  
 Who would not be a butterfly  
 Instead of just a girl?

Helen Hay Whitney.

## GLADIOLUS FOR MAY PLANTING

If we want a longer season of blooming of these beautiful summer flowers, we should make successive planting up to June 1, and for this reason I am offering herewith a selected list of especially stored bulbs for May planting.

	Doz.	100.
Europa, pure white .....	1.50	10.00
Loveliness, blush pink.....	1.50	10.00
Prince of Wales, salmon pink.....	2.00	15.00
Schwaben, pale yellow with red blotch.....	1.00	7.50
Mrs. Frank Pendleton, vivid pink, salmon sheen.....	1.00	7.00
Liebesfeuer, deep crimson .....	1.50	10.00
America, lavender pink .....	.60	4.00
Panama, rose pink.....	.75	5.00
Halley, orange pink.....	.60	4.00
Sweet Orra, pale yellow (Primulinus) .....	1.50	10.00
Niagara, straw yellow .....	1.00	8.00
Primulinus Mixture .....	.75	5.00

## GIANT FRENCH ANEMONES

Every winter my friends come to me and tell me they have seen some wonderful flowers of French Anemones in the show windows of Wadley & Smith on Fifth Avenue, and they wonder if such flowers cannot be grown in the garden. When I tell them yes, they are astonished that they are not found growing in every garden. The reason is that seedsmen offer these bulbs at the wrong season of the year—in the fall. These bulbs are not hardy and for garden use should be planted only in the spring. The bulb is a most peculiar dried-up affair, and the average gardener finds difficulty in discerning which is the top and which is the root. To avoid failures, always plant the roots on their sides. The plant has a most magnificent buttercup-like foliage, and within six weeks from the day of planting produces superb flowers on erect stems about 12 inches tall. The flowers are like giant single buttercups, 3 to 4 inches across, but come in the most vivid colors, such as true blue, scarlet, crimson, and white. Some flowers are unicolored others show a zone of white in the center, while others are striped and multicolored. The tricolor of France is so typically represented in this flower that it is named the French Anemone.

**Their Culture:** Nothing is easier to grow. Plant bulbs 3 inches deep and a foot apart in good rich soil. If possible, select a semishaded spot, for the colors are then more brilliant. Plant in April or May.

**Where It Should Be Employed:** Under shrubs, evergreens, cedars, or trees, and particularly under roses, as it makes it appear that the roses have dropped to the ground. In beds by themselves or in groups in the hardy border, it is ideal.

Assortment of the most beautiful shades.

Per dozen, 50c; per 100, \$3.50; per 1,000, \$30

*"Just Delightfully  
Different" Seeds*

## GILSON WEEDER

**Four Times the Work With Half the Effort**

The double-edged oscillating steel blade of the Gilson Weeder cuts both ways under the soil surface, destroying weeds and loosening the earth. It lightens and levels the soil and forms a perfect mulch.

Every stroke counts, backward and forward. There is no tiresome chopping movement as with the ordinary hoe. You work away from the loosened soil, instead of working over it and tramping it down.

The Gilson Weeder does the work of a rake also; clearing the ground as you work, without changing tools. It leaves the ground in perfect condition for absorbing warmth and moisture.

The weeder can be run close to the plants and shrubbery without harming them, because the side-arms act as fenders for the cutting blade. It is easy to reach under shrubs and flowers.

This particular narrow tool is a godsend to the amateur. You can now weed between closely set plants in flower beds without having to step on the bed at all. Just the ideal tool for hardy borders, which often are very deep.

**6-foot Handle**

Pat. Jan. 11, 1916

Pat. May 1, 1917

Size 1—3½-in. Blade, for Narrow Rows, with 6-foot handle.....	\$1.00
Size 2—5-in. Blade, for General Work, with 6-foot handle.....	\$1.25
Size 3—6-in. Blade, for General Work, with 6-foot handle.....	1.35
Size 4—8-in. Blade, for General Work, with 6-foot handle.....	1.50

## SCRATCH WEEDER

**Five-Point Weeder—6-in. Handle**

Pat. Applied For

Another Gilson Garden Tool which is a vast improvement over the old style tools is the Scratch Weeder, made in two sizes, for fine work in beds or for greenhouse work.

The pointed tines of the Scratch Weeder are self-cleaning and will not clog in moist earth. This is a thoroughly practical and strongly-made little tool for close work.

**Size 1—Five-Point Scratch Weeder, with 6-inch Handle, Price....\$0.25**

By mail ..... **.35**

**Size 2—Seven-Point Scratch Weeder, with 14-inch Handle, Price..\$0.50**

By mail ..... **.60**

**Seven-Point Weeder—14-in. Handle**

right; read "Flower Lore"*

## HOE CULTIVATOR ATTACHMENT

Gardening  
will be a  
Pleasure

Cut the Cost of Living.

Cultivate With an Up-to-Date Cultivator.

Just Like Play

The object of this invention is to provide a simple and inexpensive hand cultivator in the form of an attachment to any gardening hoe for forming a shallow trench for planting and for covering after planting, for cultivating close to young plants, destroying small weeds at a time in the growth of the crop that is of the greatest importance, and otherwise to adapt the garden hoe to perform a number of functions which are impossible with a blade of usual form. The original and distinguishing feature of the tool is the ease to change to suit the required work. Blades firmly locked by the thumb nuts as shown in cut. Manufactured from hard steel as durable as the hoe. Rapid and thorough work makes this cultivator a necessity. Equip your hoe with a cultivator and be convinced.

Price 75 cents each, postage prepaid

And the Spring arose on the garden fair,  
Like the Spirit of Love felt everywhere;  
And each flower and herb on Earth's dark breast  
Rose from the dreams of its wintry rest.

And the sinuous paths of lawn and of moss,  
Which led through the garden along and across,  
Some open at once to the sun and the breeze,  
Some lost among bowers of blossoming trees,

Were all paved with daisies and delicate bells  
As fair as the fabulous asphodels,  
And flowrets which drooping as day drooped too  
Fell into pavilions, white, purple, and blue,  
To roof the glow-worm from the evening dew.

Shelley.

## FLOWER LORE

By Maurice Fuld

a monthly magazine, teaching the practical growing of flowers by amateurs. It is most unique and individual and at the same time practical beyond comparison. It is all meat—no shell—contains no ads, and never repeats a single subject, once published. For the latter reason it is imperative for a new subscriber to possess the magazine beginning with the first number. The first number appeared July, 1916, so that at present Volume 3 is being published. Back numbers are always in stock.

Subscriptions for current volumes are only accepted to begin with No. 1 (July number), so that all subscriptions expire with the June issue of the following year.

Subscription rates: \$1.25 per volume or year in loose numbers; \$2 if bound in artistic cover.

If you wish to possess the magazine from the beginning and up to June, 1919: \$3.75 in loose volumes, or \$6.00 for three volumes, each bound in artistic cover. Extra self-binders, each \$0.75. Sample copies mailed free.

### What the Public Says About "Flower Lore"

"Flower Lore is assuredly first aid to amateurs. Many a plant has been saved by its timely advice."

"One of my friends reads Flower Lore, and she feels she must have it."

"The sample copies of Flower Lore you have sent me strike me as being more 'Johnny on the spot' than anything I have ever had the pleasure of reading on the subject—you get the information, when you need it."

"Flower Lore, especially, I do not care to miss; it has been most helpful to me."

"I have learned a lot from Flower Lore."

"Your publications are very entertaining and instructive. Just the little short cuts and extras which only the professionals usually know."

"I am very much pleased with your 'Lores'; they are different from the regular garden magazines. Have taken considerable interest in gardening for the last twenty years and, as gardeners go, I believe I am a pretty fair kind of gardener; but these leaflets give one a sort of 'second wind' in the business and am satisfied I can get better results by following some of your suggestions."

## VEGETABLE LORE

By **Maurice Fuld**

a monthly magazine, teaching not only the practical growing of Vegetables by amateurs but the right kinds for **your** garden, when, where and how to sow, how to care for, how to crop, how to store, and, finally, how to prepare in a tasty fashion.

It is the only magazine in the world which deals exclusively with "Growing Vegetables for the Home Garden."

It is in a class by itself. It contains no ads. and never repeats a single subject, once published. Hence it is imperative for a new subscriber to possess this magazine beginning with the first number published. The first number appeared July, 1917, so that at present Volume 2 is in process of publication.

Back numbers are always in stock.

**Subscriptions for current volumes are only accepted to begin with No. 1 (July number), so that all subscriptions expire with the June issue of the following year.**

Subscription rates: \$1.25 per volume or year in loose numbers; \$2.00 per volume or year if bound in artistic cover.

If you wish to possess the magazine from the beginning and up to June, 1919: \$2.50 in loose volumes or \$4.00 for the two volumes, each bound in artistic cover. Extra self-binders, \$0.75 each. Sample copies mailed free.

### What the Public Says About "Vegetable Lore"

"I received Vol. 1, Vegetable Lore, and am much pleased with the **detailed descriptions and explanations** of culture, etc. This is just what amateurs **and others** need to make a success of growing vegetables.

"Vegetable Lore is splendid. I am learning more about vegetable growing than I ever hoped to know."

"Vegetable Lore is invaluable to me."

"Your magazine fits the city lot garden and is especially helpful to amateurs."

"Please renew my subscription to Vegetable Lore. I don't want to miss a single number—would rather do without all the other books and magazines."

## My Favorite Dahlias

No other family of flowers can boast of more children than the dahlia. Be it known that there are no less than 20,000 different varieties of dahlias catalogued today in the world, and no one grower has ever listed them all. But all list too many.

I am the first to have the courage to eliminate; and I do this from a standpoint of practicability; I do not choose a sort just because the flower is exquisite in form or color, if it hangs its head down and you have to be on the ground to see it. Nor do I select a sort which, while it is beautiful, bears but one or two blooms in the season, but I do above all pick out a sort if it is a worker, no slacker—and if it works all the time. I do pick out a sort if every flower is carried on a stiff, long stem; I do enthuse for a sort when, with the foregoing qualities, the color is exquisite, and, finally, if it grows easy I have nothing further to ask of it.

Nothing is more disappointing than to make a selection at the flower show because dahlias are shown on short stems and are judged by size.

The largest blooms invariably are too heavy for their stalk and hang downwards, one of the worst faults to contend with a dahlia, and, then, also, it may produce one good flower a season.

For this reason I am presenting this year a limited list of sorts, of which each one is a worker and a winner.

Many of the dahlias offered by me are productions of the world's greatest dahlia raiser, Mr. John H. Slocombe, of New Haven, Conn., and I offer many more than he lists himself. His varieties are followed by (S).

All plants will be shipped about May 20th.

Some say that it is very easy to grow dahlias, but I say that it requires more skill and science than any other flower. A dahlia, grown indifferently, is a weed, but a dahlia grown with the proper care is a masterpiece. If you want to have a few masterpieces in your garden, you must read "How to Grow Dahlias," as published in "Flower Lore," Volume 2 and Volume 3; subscriptions, \$1.25 per volume.

### Novelty 1918

#### New Decorative Dahlia, "Maurice Fuld"

When I saw this Dahlia growing amongst Mr. Slocombe's seedlings, it attracted my attention instantly as being the loveliest dahlia both in form, habit of growing and color, that I had ever seen.

The plant has all the earmarks of Slocombe's best. It is free in habit and open in form. It sends its flowers upon wiry, rigid stems with little or no foliage, measuring fully two feet long.

The form of the flower is an advance of unusual merit. Each petal is twisted and curled in regular formation, and even the center is finished in the same manner; the petals are long and only of medium width. I do not know of another flower which has this form. It attracts the eye instantly and is pleasing to the extreme.

The flowers are not monsters, and I am rather glad of this, because we find more use for a medium-sized flower.

I claim this new dahlia will be a useful one, for while no doubt it will be sought for the garden, it will be equally well in demand for a cut bloom, for its stem, rigidity and form are just ideal, and it is borne so freely that we can really have bunches of flowers to cut from a few plants.

The color—here is its greatest drawing card:

A most charming pink, and the only way I can describe it is to tell you that it is of the shade we find in the dahlia called "Delice." A vase of this flower is simply superb.

Plants only \$1.00 each.

## SPECIAL OFFER OF DAHLIAS

To introduce my finer dahlias to all lovers of this flower, I offer herewith an exceptional opportunity.

which I can heartily recommend to my patrons*

# GARDEN GUIDE

## The Amateur Gardeners' Handbook

336 pages and over 275 teaching illustrations with beautiful cover in four colors.

PRICE \$1.00, CLOTH

Roses on arches and Sweet Peas on trellises between. On either side are Rose beds in the lawn. Iris beds in the foreground. This is not an expensive proposition.

Third edition, enlarged and improved. Undoubtedly the standard book of the day. Compact, complete, unrivalled. Professionals solve every problem of the soil, thereby making of GARDEN GUIDE that reliable instructor amateur gardeners have been looking for all these years.

### Covers Every Step from Plowing the Ground to Preserving the Harvest

This book will tell you everything you need to know about your home ground surroundings, your vegetables, fruit and flower garden, trees, shrubs, lawn, etc. Covers in detail:

Trees and shrubs; the Rose garden; Everybody's flower favorites; annuals and biennials; bulbs and tuberous rooted plants.

Garden furniture.

Growing Tomatoes, Peas, Beans, Cabbage, Celery Beets, Corn, Onions, and all chief vegetables.

Growing fruits for the small garden or orchard; Apples, Peaches, Grapes, Berries, etc.

Constructing hotbeds, coldframes, seed boxes, etc.

How to prune and propagate; control insect pests and diseases; all about soils, fertilizers, spraying, tools, et cetera, and

**1001 other live, up-to-date Gardening Facts,  
simply explained—easily followed.**

### These Well-known Specialists Have Written Garden Guide

F. F. ROCKWELL (Author of "Vegetable Garden" section) obtained his knowledge in the most practical field, that of a market gardener. A. G. PETERKIN is the amateur gardener who won the \$100 prize offered by *Good Housekeeping* for the best amateur garden.

A. J. LOVELESS (Author of "Fruit Garden" section) has for 30 years made a specialty of first-class fruit production. His knowledge of the subject pre-eminently fits him to instruct others.

A. C. HOTTES is Assistant Professor of Horticulture at Ohio State University, a popular teacher and well known through his conscientious work.

CHAS. LIVINGSTON BULL (Author of "Birds in the Garden" section) is the celebrated animal painter, also a recognized authority on birds; he knows their every song, habit and instinct.

DR. W. E. BRITTON of the Connecticut Agricultural College, furnishes the chapter on Insects and their treatment, fully illustrated. This feature alone is worth the price of the book.

ROBT. B. CRIDLAND, a leading landscape gardener, has furnished many plans for the laying out of the home grounds. . . . And there are others.

**Splendid features of Garden Guide are the layouts (plans) for vegetable, flower and fruit gardens. These are real workable plans and far superior to those which go the rounds of the press, or are to be found in most gardening books.**

**MAURICE FULD, 7 West 45th Street, NEW YORK**

# Practical Landscape Gardening

ROBT. CRIDLAND

*Without a shadow of a doubt, the best book obtainable at the price*

A REAL HOME IN THE COUNTRY

First practical book ever written for people of moderate income. Through its conciseness and lucidity of expression, rarely met with in technical or semi-technical guides, the reader is encouraged at the ease with which he can acquire all needful instruction on every detail connected with landscape gardening and as to the embellishment of the home grounds.

The home builder will find Practical Landscape Gardening of great assistance and pleasure, as its advice will enable him to avoid those mistakes which are expensive and a source of subsequent annoyance. To have a preconceived idea of the scheme of your home grounds as an integral whole affords additional interest and enthusiasm in its ultimate achievement.

The book contains eleven chapters, arranged as follows:

1. The Importance of All Careful Planning.
2. Locating the House.
3. Arrangements of Walks, Drives and Entrances.
4. Construction of Walks and Drives.
5. Lawns and Their Grading, Construction and Upkeep.
6. Ornamental Planting of Trees and Shrubs.
7. The Flower Garden.
8. Architectural Features.
9. Hardy Borders and Rose Gardens.
10. Wild Gardens and Rock Gardens.
11. Planting Plans.

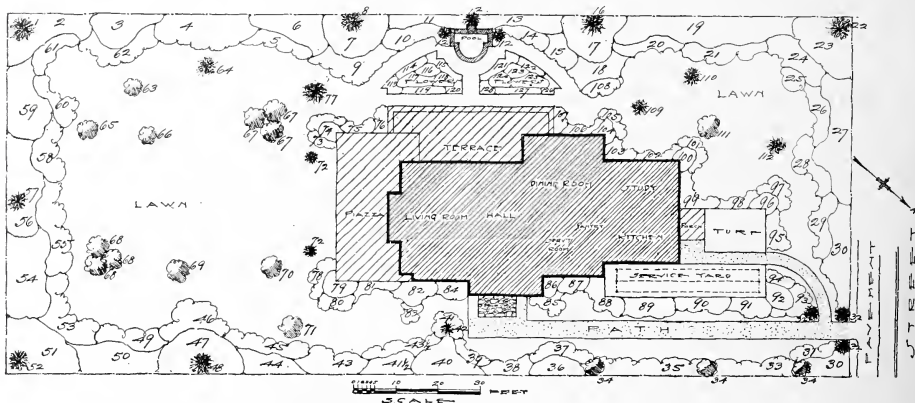

FIGURE 181—Plan for residence on a lot 90 ft. x 200 ft., kitchen wing toward street screened by plantings, living room facing southeast with a view over the lawn. The fountain and pool is an interesting feature.

**PRACTICAL LANDSCAPE GARDENING** is an entirely different book from any landscape treatise previously written, because it fits into your wants, considers practicability equally with the laws of art and beauty, and covers every detail. It contains 91 photographic illustrations, 67 sketches and 33 plans, 19 of which are planting plans accompanied by planting keys.

The type is large and clear; the paper is enamel; the binding durable. The color plate on front cover is irresistibly attractive; it portrays a wonderful landscape scene. 266 pages. Size, 6x8 in. Price, delivery postpaid..... **\$1.90**

# GILSON GARDEN TOOLS

*The Choice of  
the Successful  
Gardener*

CULTIVATOR— .... an implement....  
to keep the soil in a porous condition and  
to kill weeds.— *Webster's Dictionary.*

# GILSON GARDEN TOOLS

THE LIBERTY Adjustable Cultivator-Weeder is the ideal tool for all-around garden cultivation—in the city garden or on the truck farm. It pulverizes the top soil into a perfect mulch which absorbs and retains moisture, permits expansion and growth of plant roots, and allows the sunlight and air to penetrate.

The special design of the cutting teeth makes quick and thorough work of destroying weeds. The teeth are of unbreakable malleable iron, with sharpened cutting edges.

5-foot Handle.

Patent Applied For

7-Tooth Liberty Hand Cultivator... Price \$1.55

5-Tooth Liberty Hand Cultivator \$1.25  
Adjusts 4 to 7 inches (4½-Ft. Handle)

The Liberty Cultivator (Hand or Wheel) is so fashioned as to do its work with the least amount of pulling force. No downward pressure is required. It adjusts to any width from 4 to 10 inches between rows; middle tooth removable for straddling rows.

Liberty No. 1  
Wheel Outfit

FOUR HEIGHT  
ADJUSTMENTS

14-in. Wheel and  
7-Tooth  
Cultivator

ADJUSTABLE  
FROM  
4 TO 10 IN.

Price  
\$3.65

WHEEL OFFSET  
WITH MIDDLE TOOTH  
REMOVED FOR  
STRADDLING ROWS

Liberty No. 2 Special 16-inch wheel, 9-Tooth Cultivator Outfit for Truck Gardening, Adjustment 5 to 14 inches.....Price \$4.15

THE GILSON WEEDER is for close work around bushy plants, as well as general gardening. The double edged rocker blade cuts both ways beneath the soil surface, destroying weeds and loosening the earth. It lightens

and levels the soil and forms a perfect mulch. Every stroke counts, backward and forward. The

Gilson Weeder does four times the work of the ordinary hoe, with half the effort. The 6-foot handle permits working in a natural upright position, saving labor and backache. The weeder can be run close to plants and shrubbery without harming them, the side arms acting as fenders for the cutting blade.

6-Foot Handle

Pat. Jan. 11, 1916, May 1, 1917

3½-in. Blade for narrow rows.	\$1.00
5-inch " " heavy soil ...	1.10
6-inch " " lighter soil .	1.15
8-inch " " wide rows ...	1.25

The hand tool is unexcelled for weeding and cultivating under shrubs and flowers. It is used by growers of tobacco, cabbage, potatoes, etc.

The Gilson Weeder attached to the Gilson Wheel Outfit is a powerful tool for the destruction of weeds. The keen cutting blade bites deep into the earth, cutting the weeds below the surface, and at the same time pulverizing the top soil. It is the lightest wheel outfit built, at the same time strong and durable.

Gilson Weeder  
No. 3 Wheel Outfit  
14-in. Wheel and 8-in. Blade

Price  
\$3.50

By removing the handle from either the Liberty Cultivator or Gilson Weeder, the socket may be easily and quickly attached to the Gilson Wheel Outfit.

GILSON GARDEN TOOLS are fully guaranteed by the manufacturer. We have tried them and proved their merit as to design and efficiency. The quality of workmanship and material is fully covered by the manufacturer's guarantee.

# GILSON GARDEN TOOLS

## A Complete Outfit for Intimate Garden Cultivation

Both the Liberty Cultivator and the Gilson Weeder enable you to work away from the cultivated soil, instead of tramping over it, as with ordinary hoe

The definition of a cultivator which Webster gives is:

"An implement used to break up the surface of the ground while the crops are growing in order to keep the soil in a porous condition and to kill weeds."

These two primary objects, then, must be accomplished by any tool which aspires to promote the art of scientific gardening. For it is an art, the oldest the world knows, and Pope has said in his "Essay on Man":

"Where grows?—Where grows it not?  
If vain our toil,

We ought to blame the culture, not the  
soil."

The lament of the student of gardening has been for lack of progress in perfecting tools for better cultivation. The old-fashioned hoe has scarcely known a change from its beginning, except in the minor points of heft and balance and polish.

In producing the line of Gilson Garden Tools, the makers have borne in mind the vital need of frequent and thorough cultivation, and have successfully sought to lessen the physical labor while attaining maximum results. How successful they have been you cannot know until you have tried the tools. Their cordial reception by able gardeners, and the judgment you will form from the descriptions on the following pages, must be your guide in choosing the right kind of of garden equipment.

## Gilson Scratch Weeders

The pointed tines of the Gilson Scratch Weeder are self-cleaning and will not clog in moist earth. Gilson Scratch Weeders come in three sizes. The two larger sizes are furnished either with or without the steel spud, which is a forked blade used for cutting large weeds.

*Patent Applied For*

Five-Point Scratch Weeder with 6-inch handle.  
**Price each 17 cents**

Light 7-point Scratch Weeder. with a 14-inch handle, made with a steel spud attachment, for cutting heavier weeds. Just the thing for the small vegetable or flower garden.

**Price without spud, 35 cents**  
**With spud, 50 cents**

Heavy 7-Point Scratch Weeder, heavy style, with 4-ft. handle, for general gardening use.

**Price without spud, 75 cents**  
**With spud, 90 cents**

Everywhere we see the life of Man in subservient union with the life of Nature; never, in a word, as a sub beset by tributary stars, but as one planet among the innumerable concourse of the sky, nurtured, it may be, by the light from other luminaries and other spheres that we know of. That we are intimately at one with Nature is a cosmic truth we are all slowly approaching. It is not only the dog, it is not only the wild beast and the wood-dove, that are our close kindred, but the green tree and the green grass, the blue wave and the flowing wind, the flower of a day and the granite peak of an aeon. . . . We are woven in one loom, and the Weaver thrids our being with the sweet influences, not only of the Pleiades, but of the living world of which each is no more than a multicoloured thread: as, in turn, He thrids the wandering wind with the inarticulate cry, the yearning, the passion, the pain, of that bitter clan, the Human.

Truly, we are all one. It is a common tongue we speak, though the wave has its own whisper, and the wind its own sigh, and the lip of man its word, and the heart of woman its silence.

Fiona Macleod.
